IA-OPT576WC

Illuminator for image sensor testing

This Illuminator is used for testing of image sensors. It built in the test head and irradiates the sensor with controlled light.

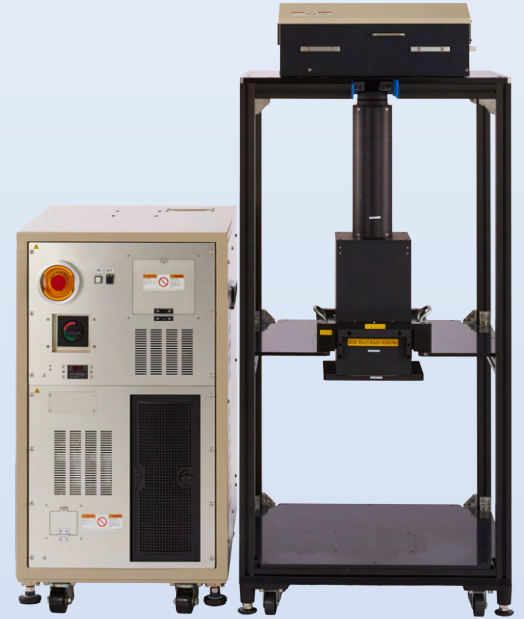

Chromaticity correction is possible at each illuminance, making it possible to irradiate light with high chromaticity reproducibility.

Characteristics

- 1 High illuminance, wide lighting area Illuminator
- 2 Chromaticity stability less than +/-0.3%
- 3 Telecentricity less than 1.0 deg.

*Some of product specifications can be customized, so please feel free to contact us.

Model No.	IA-OPT576WC
Type	Internal docking to tester
Lighting area	160mm × 150mm
Uniformity	less than +/- 2.0%

Attention

- Read the instruction manual or system specifications carefully before use, also make sure to read the "Safety Precautions".
- This catalog is current as of January 2023. Specifications and products are subject to change without notice and without liability to the manufacturer.
- The warranty period is 1 year from the date of delivery of this product.
